# Kia ora koutou, and welcome to the ATSNZ Disability Expo 2026.

On behalf of Assistive Technology Suppliers New Zealand (ATSNZ), welcome to two days of assistive technology, learning and connection.

This is our seventh Auckland Expo, showcasing equipment and services that help disabled people and older New Zealanders live with greater independence, dignity and choice.

Our exhibitors are at the heart of the event, bringing together manufacturers, suppliers, service providers and sector organisations. I encourage you to talk with them and discover what's possible.

This year's theme, Outcomes That Matter: AT in Real Life, highlights the difference assistive technology makes and the partnerships between suppliers, clinicians and funders that help achieve meaningful outcomes.

Thank you to our speakers, exhibitors, supporters and the Icon Events team for making this Expo possible. Enjoy the event, and we look forward to welcoming you to future ATSNZ Expos.

**Ngā mihi,**
**Gary Holmes**
**Executive Officer, ATSNZ**

# Speakers

## Alistair Hill

### General Manager, Disability Support Services

Alistair sets the strategic direction for change and improvement across Disability Support Services (DSS). He joined in 2024 to lead the response to the Independent Review of DSS, including its transfer from Whaikaha – Ministry of Disabled People to the Ministry of Social Development, and the 2026 changes to assessment and allocation and the return of flexible funding. Alistair has 18 years in the public service, including senior roles at MSD and the Public Service Commission.

## Amy Bjornson, PT, ATP, SMS

### Clinical Director, Sunrise Medical Australia

Amy is a US-trained physiotherapist with over 20 years' experience in neurological rehabilitation, spinal cord injury and assistive technology. A former director of Boston's Seating and Mobility Clinic, Amy now leads national and international training for Sunrise Medical and speaks widely on seating and mobility.

## Ana Pacheco

### Product Consultant, Medifab

Ana is a registered occupational therapist with over 18 years' experience, including 10 as a specialist wheelchair and seating therapist. At Medifab NZ, Ana focuses on wheeled mobility and seating provision, 24-hour postural management assessments, and supporting clinicians with equipment selection and setup. Ana is passionate about building therapists' confidence in clinical assessment and equipment choice.

# Speakers

## Andrew Lopez

### Clinical Educator/Product Specialist, Quantum Rehab

Andrew is an occupational therapist with over eight years' experience in complex seating and wheelchair prescription. A dedicated assistive technology specialist, he combines clinical expertise with a strong commitment to person-centred care. At Quantum Australia, Andrew supports clinicians and service providers through education, training and product knowledge, helping advance best practice in seating and mobility.

## Anna Sokol,

### Clinical Educator, Director Of Clinical Support and Business Development, Motion Concepts

Anna is a registered nurse certified in wound, ostomy and continence care, with experience across acute, rehabilitation and home care. She bridges the gap between seating prescribers and nurses, consulting on cases involving skin integrity. Anna contributes to Matrx® product development and clinical research, sits on RESNA/ISO wheelchair seating standards committees, and presents regularly at international seating and mobility conferences.

## Christa Roessler

### Professional Advisor, Enable New Zealand

Christa has worked as an occupational therapist since 1988, with specialist expertise in complex assistive technology, home modifications and clinical reasoning. As a Clinical Service Advisor at Enable New Zealand, she supports the assessment, prescription and provision of equipment and housing solutions, drawing on experience across health, disability, education and rehabilitation in New Zealand and internationally.

# Speakers

## Clare Molloy

### Clinical Educator/Product Specialist, Quantum Rehab

Clare is a paediatric occupational therapist with 30 years' experience, specialising in housing modifications and equipment for children with complex physical needs. Having worked with Auckland's Child Development teams and ACC-funded services, Clare enjoys the variety of children, families and practical problem-solving the work brings.

## Dheshini Naidoo

### Enable New Zealand

Dheshini is an occupational therapist with over 20 years' experience across Health NZ, ACC, community, paediatric and vocational rehabilitation settings, with expertise in complex equipment, housing modifications, sensory regulation, clinical supervision and service development. At Enable New Zealand, Dheshini focuses on empowering people and supporting clinicians to deliver evidence-informed, person-centred solutions.

## Gabriel Ramji

### Paediatrics Product Specialist, Etac, Uk

Gabriel has built his career in paediatric mobility, helping children with mobility needs stand, move and take their first steps. As Paediatric Product Specialist at Etac United Kingdom, he leads the southern England paediatric team, working alongside therapists on assessments and clinical education. His special interest is dynamic postural management and timely intervention, particularly how the right support helps children develop alignment, confidence and participation.

# Speakers

## Garry Stanners

### Community Care Team Leader, Cubro

Garry leads Cubro's community care team, providing specialised and customised equipment that meets each person's needs and suits their living environment, so people can enjoy the quality of life they deserve.

## Gilly Davy

### Senior Consultant Neurological Physiotherapist, MS Get a Head Start & Rope Neuro Rehabilitation

Gilly is a senior neurological physiotherapist at Rope Neuro Rehabilitation in Auckland and the founder and director of MS Get a Head Start. She previously ran her own clinic, Connect Neuro Physiotherapy, for six years. Since graduating in the UK in 2004, Gilly has worked in public and private settings in the UK, Australia and New Zealand. Her awards include an Australian Physiotherapy Association commendation for Achievement in Neurological Physiotherapy and an Honorary Clinical Fellowship with the Australian Catholic University. She recently completed her Masters at AUT.

## Jacqui Abel

### Occupational Therapist, Specialist Rehab Services

Jacqui is an occupational therapist with 30 years' experience in South Africa and New Zealand, specialising in spinal cord injury rehabilitation and complex wheelchair and seating assessment. A former clinical leader at the Auckland Spinal Unit and advisor at Accessable, Jacqui now contracts with Specialist Rehab Services and volunteers at Altus Pacific Aid Trust wheelchair clinics.

# Speakers

## Jess Vallance

### Clinical Advisor/Occupational Therapist, WS Medical

Jess is a registered occupational therapist and clinical adviser at WS Medical, with over 30 years' experience across the UK, USA and New Zealand.

Jess has worked in acute, inpatient rehabilitation, hospice and community settings, and brings specialist seating assessment skills across all ages. With a client-centred approach, Jess takes pride in promoting independence and quality of life.

## Judy Rowley

### VP - Business Development and Education, Raz Design

Judy developed and managed a world-class portfolio of wheelchair seating and positioning products. Now a leading advocate for applying the same evidence-based principles to wheeled shower commode chairs, Judy champions bathroom equipment as an essential part of 24-hour postural management, with the potential to improve posture, skin integrity, function, comfort, caregiver safety and quality of life.

## Karen Adams

### Clinical Educator/Product Specialist, Quantum Rehab

Karen is a paediatric physiotherapist working with children with complex physical disabilities in the community and at the AUT/Starship National Gait Analysis Service.

A passion for this work has led Karen to a PhD on physiotherapy interventions for school-aged, non-ambulatory children with cerebral palsy and intellectual disability.

# Speakers

## Dr Kevin Ross

### Director, Artificial Intelligence & Data, Deloitte

Kevin helps organisations use data and artificial intelligence to deliver better outcomes while maintaining trust and accountability. Previously CEO of Precision Driven Health and a senior executive at Orion Health, Kevin has led initiatives bringing together healthcare, technology and data science to improve lives. Kevin holds a PhD from Stanford University and is a Fellow of Health Informatics New Zealand.

## Kylee Black

### Founder, Kylee & Co

Kylee is a disability leader, entrepreneur, public speaker and social butterfly. From leading Clipboard and Kylee & Co to co-founding Stronger Together, Kylee builds businesses and communities that put disabled people at the forefront of change. Living with complex disabilities has strengthened Kylee's determination to create a world where disabled people can live life on their own terms.

## Lasni Herath De Alwis

### Speech Language Therapist

### ABI Rehabilitation New Zealand Ltd

Lasni is a speech-language therapist with 24 years' experience supporting people with communication disabilities in New Zealand. As co-author, Lasni has supported Ryan with developing the abstract and preparing the presentation. During the session, Lasni will provide communication support as needed, while keeping Ryan's lived experience and voice at the centre.

# Speakers

## Lititia Walker
## Director, Natural Mechanics

Lititia has more than 20 years' clinical experience in wheelchair and seating, complex postural management and assistive technology, and is founder and director of Natural Mechanics, an Auckland-based service providing social rehabilitation assessments for ACC. Lititia works with people of all ages with complex neurological, orthopaedic and physical disabilities, delivering evidence-informed solutions that maximise pressure care, function, participation and independence.

## Maria Whitcombe-Shingler
## Educator, Te Whatu Ora

Maria is a registered occupational therapist and clinical educator at Mobility Solutions, Te Toka Tumai Auckland, supporting therapists to become credentialed in wheelchair and seating. Maria's qualitative research explored adults' experiences of using multifunction power wheelchairs in Aotearoa. Maria is passionate about evidence-informed practice, assessment tools and clinical reasoning to achieve the best outcomes for wheeled mobility users.

## Mellinda Clarke
## Physiotherapist And Clinical Educator, Apex Mobility

Mellinda is a physiotherapist with 25+ years' experience in paediatrics and disability. After starting at Cerebral Palsy League in Brisbane, Mellinda held child development,  hospital, special education and wheelchair and seating leadership roles in New Zealand. Back in Australia, Mellinda joined Apex Mobility in 2023, focusing on assistive technology education to help people of all ages live their best lives.

# Speakers

## Rhona Akroyd
## Occupational Therapist / Clinical Specialist, Seating to Go

Rhona is an occupational therapist with extensive experience in wheelchair, seating and postural care. Rhona's practice focuses on person and whānau-centred care, clinical reasoning and practical outcomes that matter in everyday life. Together, Kylee and Rhona combine lived experience, whānau knowledge and clinical expertise to support partnership-based decision making.

## Ryan Scott

Ryan has lived experience of communication difficulty resulting from locked-in syndrome and uses a Tobii Dynavox i-30 device for everyday communication. Ryan is passionate about sharing the realities of using augmentative and alternative communication (AAC). Ryan hopes to help clinicians, service providers and technology developers understand the challenges, successes and barriers, and improve services for people with communication difficulties.

## Shane Andrews
## Chief Experience And Growth Officer Enable New Zealand

Over the course of Shane's career he has made a habit of measuring complex things, from financial services to marketing performance. At Enable New Zealand his focus on customer experience has seen a new level of data, moving beyond satisfaction levels and into insights.

# Speakers

## Tess Wallis
## Physiotherapist/ Wheelchair And Seating Therapist, ABI Rehabilitation

Tess is a Netherlands-trained physiotherapist with over 25 years' experience in New Zealand, Australia and the Netherlands. For the last 12 years, Tess has specialised in complex wheelchairs, seating, sleep systems and postural support for people with spinal cord injury and neurological conditions. Tess works with ABI Rehabilitation and Geneva Wellbeing, and volunteers at Altus Pacific Aid Trust wheelchair clinics.

## Tilly Brook
## Director Clinical Services, Permobil

Tilly is an occupational therapist with extensive wheelchair and seating experience across Australia, New Zealand and Singapore. Tilly's passion for the field began in brain injury rehabilitation and has grown ever since. Having helped develop clinical teams, Tilly now focuses on education, mentoring and developing best practice guidelines for clinicians. Tilly holds a Master of Occupational Therapy (Hons).

## Tina Roesler
## MSPT Dir. Of Clinical And Bus. Development Bodypoint

Tina is a physical therapist, author and international presenter with over 30 years' experience in rehabilitation, home care, paediatrics and long-term care, focusing on seating and wheeled mobility. A Boston University graduate, Tina has held leadership roles in education and business development, was a long-standing member of the Clinician Task Force, and has presented at seating conferences worldwide.

# Speakers

## Ulrike Luebcke
## NZROT and Clinic Specialist at Medifab

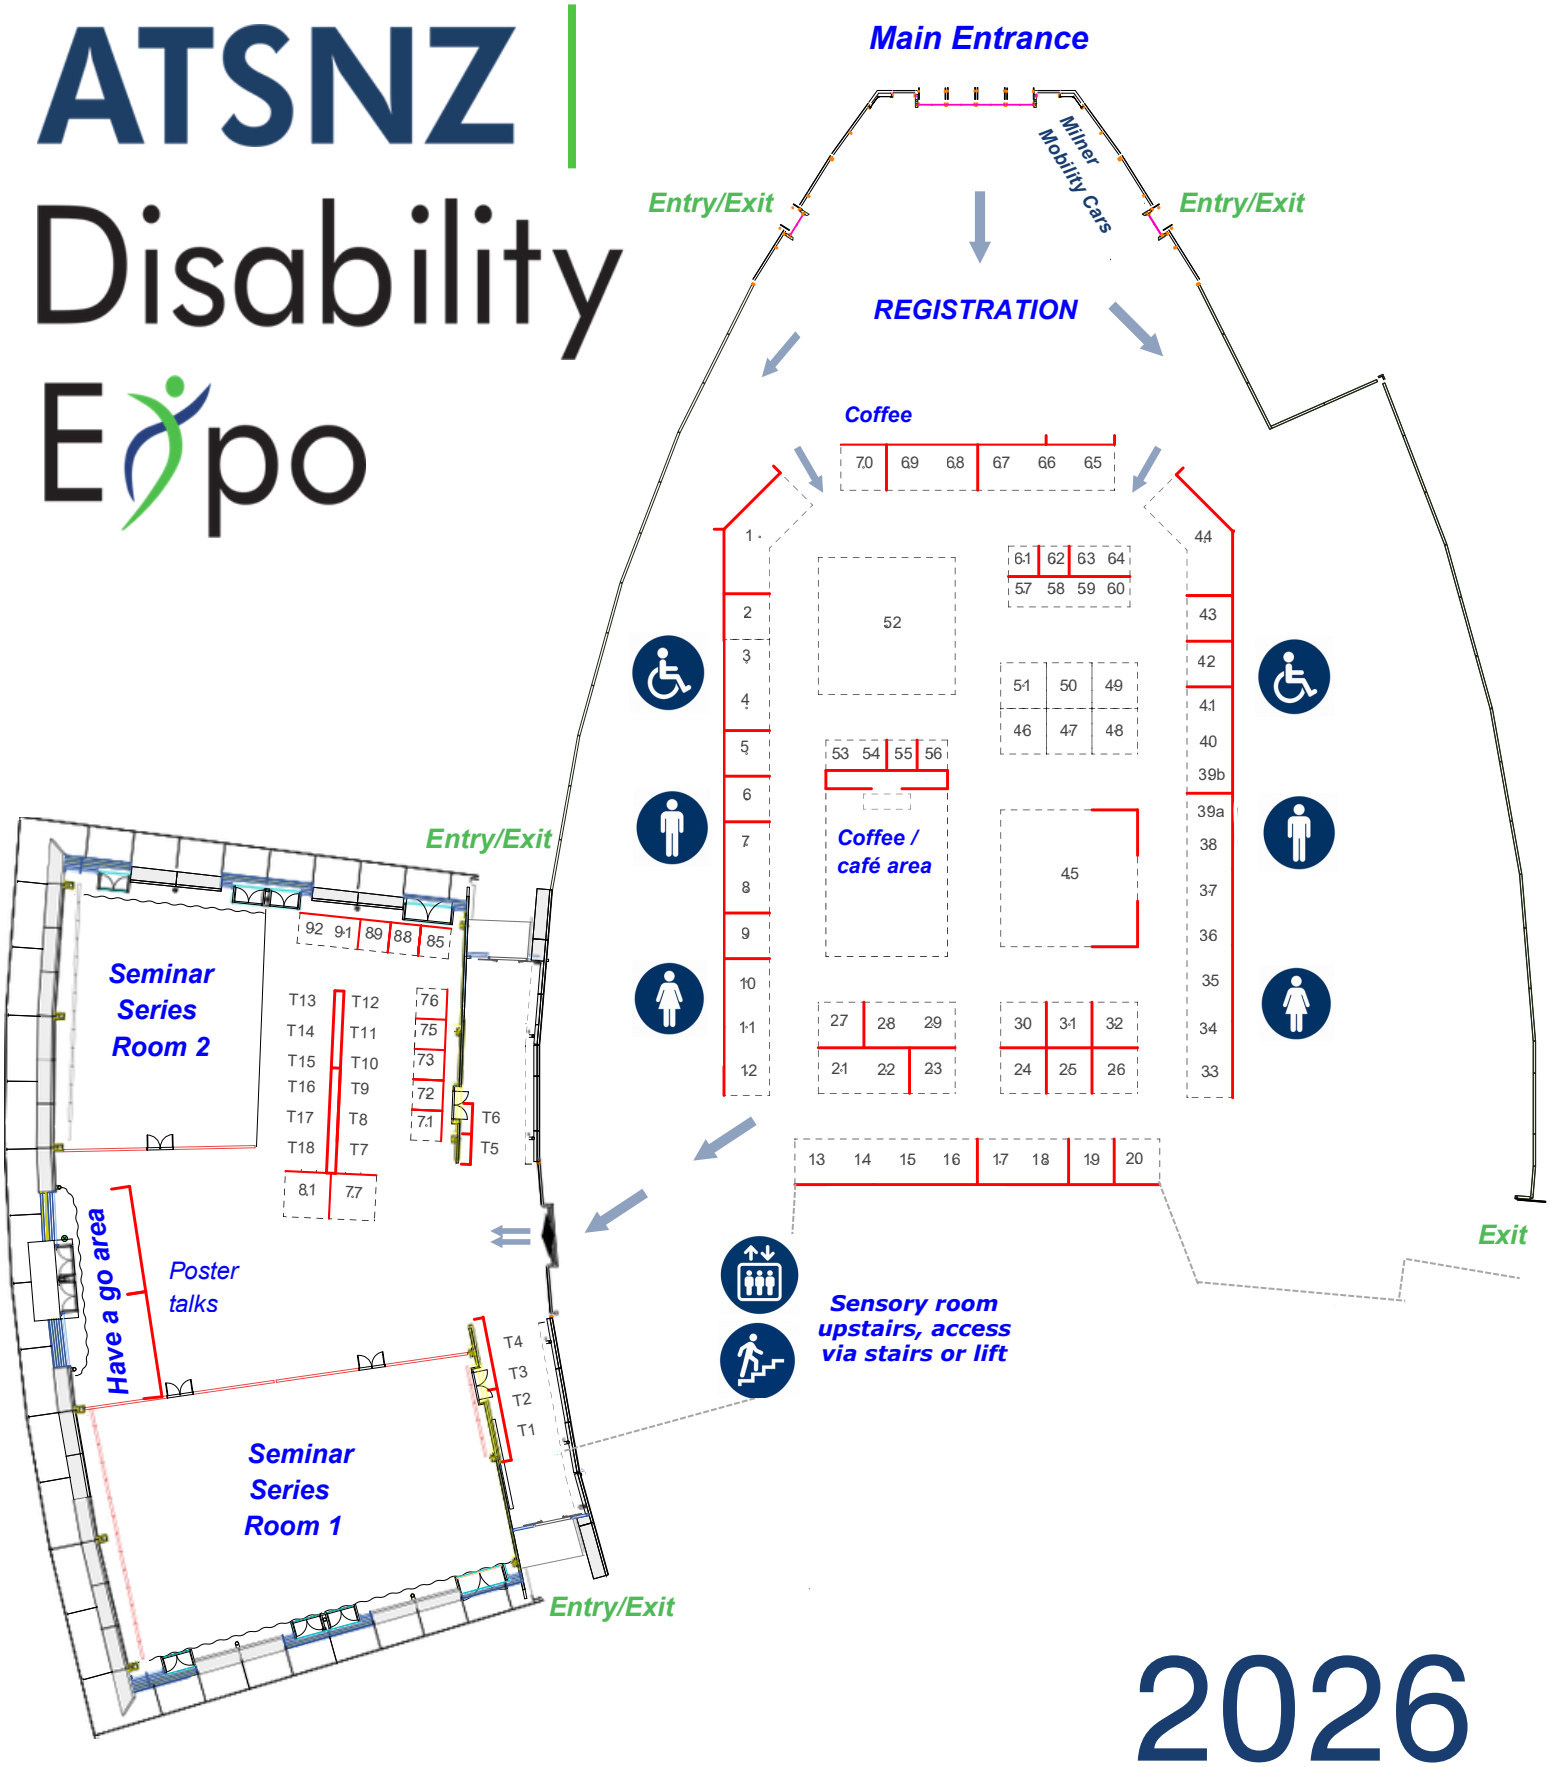

Ulrike is a registered occupational therapist based in Christchurch, with more than 30 years' experience in rehabilitation, wheelchair seating, postural management and assistive technology. Ulrike supports clinicians with the assessment, prescription and configuration of seating and postural support systems, and works with designers and engineers to refine products and develop solutions for people with complex disabilities.
